

FLETTEINSTRUKTION

Denne luksus gaveæske indeholder alt,
du skal bruge til at flette 16 klassiske rød/hvide hjerter

EASY TO FOLLOW INSTRUCTIONS

This gift box contains everything you need for creating
16 of your very own woven paper hearts

Hjertet flettest lettest når du holder hjertedelene som på billedet. Dvs. de runde buer mod din krop.

We recommend weaving the heart while holding it upside down, to frequently check for errors on the opposite side while weaving and to carefully study this full instruction before starting. The technique of weaving enables the heart to open inside. The paper strips alternate by going through and around (overlapping) each other.
